Hi, Zelan. Regarding accessibility, lahat na man ng students may access to a phone pero WiFi, as usual, is a problem especially for the boarding students. In terms of learning, I haven't actually started teaching my students the language so I'm not exactly sure about their specific struggles. Pero given that it's a new script, I assume the students would have a hard time staying consistent. I remember when I was learning Spanish in college, I'd usually only review during class hours (something I wouldn't like for my students kasi there's less familiarity with Baybayin and it's not used outside of class).

Di rin nagagamit ang Baybayin everyday diba so it would be really good kung may Tagalog to Baybayin translator para may basis ang mga students ko for learning on their own.

Appendix B: Feedback Form

BayBai Feedback Form

Form description

Please confirm that all the features work properly

- ☐ User progress will be kept independently using an encrypted login system.
- ☐ The flashcards in Learning Mode show Baybayin characters and when tapped, reveal the corresponding Tagalog translation.
- ☐ The app allows the user to transcribe Tagalog words to Baybayin script.
- ☐ The app allows the user to copy the transcribed word to their clipboard.
- ☐ The app allows the user to save a flashcard for later reference or memorization.
- ☐ App contains an online forum that allows users to add posts about Baybayin-learning-related content.

Context

Please also this text field as an opportunity to give context for your previous answers if needed.
